Hyde & Associates has an opening for a software engineer with 3 years' of work experience or more, to be based in our Tallinn office to assist the firm in developing and maintaining internal web applications. The position is an ideal mid-level position for a motivated and independent-minded software engineer.

Key Responsibilities include but are not limited to:

- Develop server-side applications with front-end interfaces for internal systems;
- Adhere to best practices such as writing automated tests and code review;
- Support already existing integrations and services;
- Analyze requirements and advise the firm on technical issues;
- Documenting solution design according to the defined standards;
- Creating prototypes using design system components (UI/UX);
- Ensure scalability and high performance of applications.

WE OFFER

- A unique opportunity to work with an international team representing the planet's largest organizations worldwide;
- Developing your technical and reporting skills;
- Opportunities for professional growth;
- Being part of an enthusiastic and multicultural group.

QUALIFICATIONS

- University Degree in IT/Computer Science;
- Have comprehensive software development experience (Java);
- Detailed understanding of all phases of software delivery cycle;
- Extensive knowledge of back/front end, web technologies, databases;
- Proficiency with JavaScript and frameworks like React or AngularJS;
- Excellent communication skills in English.

You will get extra points for:

- Having experience with any of the following technologies: AWS, Azure, SharePoint;
- Having previous experience with development of enterprise applications and document stores.

PROFILE

- Ability to explain technical information to non-technical staff;
- Good problem-solving and analytical skills;
- Good communication and organisational skills;
- Independent and adaptable.
